

Needs in this project demanded a multi-use structure that would hold up to years of use in an industrial setting. The customer, with past experience using “soft-sided structures,” was impressed with VersaBilt modular buildings which, though “non-blast,” are rugged, heavy gauge steel. As a security/guard office, the structure is outside of the blast zone, and required only non-classified electrical equipment. Customizations included the addition of a sliding window into a reception area, men’s & women’s restrooms, a kitchen, a conference room, multiple offices and an electrical room.

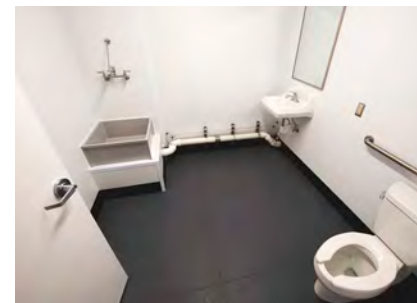

BUILDING SPECS AND FEATURES

Building Size:

27' X 41' X 11'

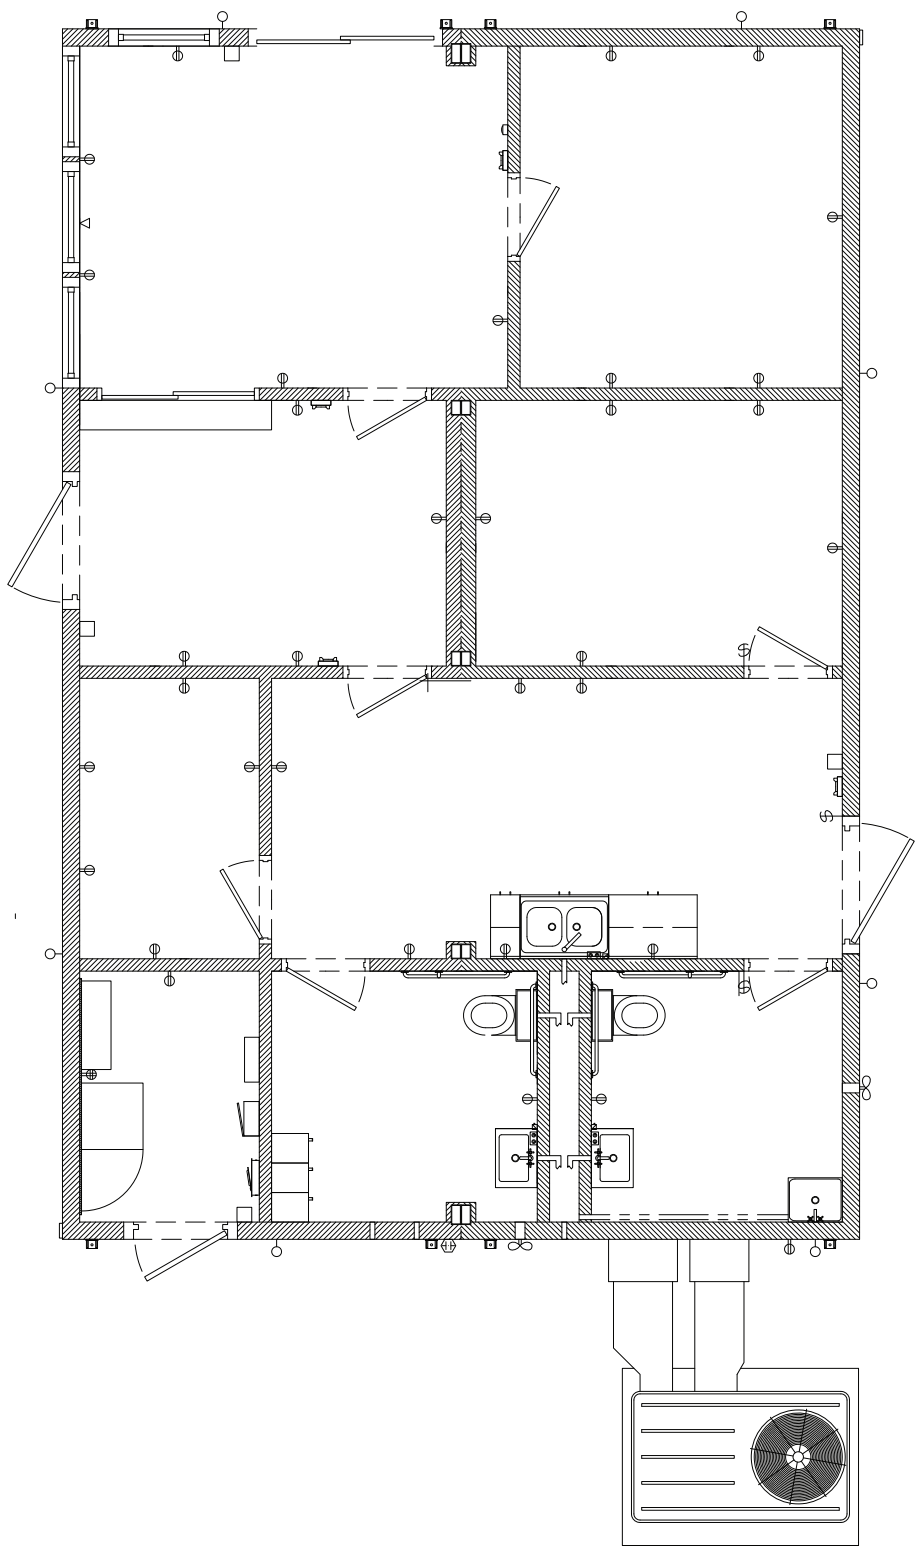

Protection Level:

VersaBilt

Why RedGuard?

RedGuard builds modular solutions that protect lives and assets. It is the leading supplier of blast-resistant buildings and modular safe spaces. RedGuard's other innovative divisions and product lines specialize in modular safe structures, most with threat mitigation. The company is dedicated to five key disciplines: concept, design, build, installation and operation. Its success across these areas of expertise has led some of the world's largest organizations to trust their employees' lives to RedGuard products.
